

*How to manage and monitor the acronyms of IT... here is how!!*

## Data Center Infrastructure Management (DCIM) Solutions

PUE, DCiE, DCO, AUE, VM, Uptime & Load Capacity

**Build > Manage > Monitor** your dynamic infrastructure by integrating a DCIM platform of operational and environmental efficiencies, automated processes to measure historical data, trends and automated processes to best manage your center.

**Premier Solutions Co.** understands the pain of managing your data center's physical infrastructure. Proactive data center management requires the ability to make informed decisions to enable day-to-day efficiencies and operations.

Since our inception in 1997, we have successfully completed more than 45 physical infrastructure build-outs, provided optimization services from data center cooling to managing power loads and managed server access for over 50M square feet of space.

As an elite partner, we represent leading providers of DCIM (Data Center Infrastructure Management) software like Aperature, APC, Avocent/Emerson and Modius.

**“DCIM tools are evolving rapidly and will become a key part of a data center manager's arsenal during the next few years.”**

Our mantra is to assist you with DCIM that best satisfies your growing IT demand, whether your operation is 1K square feet or spread out over multiple sites of over 1M square feet. Premier Solutions Co. and our partners can tailor a program for you.
